

## **WANTEC invests in Upgraded Facilities (03/04/02)**

24 x 7 x 365 Real Time Proactive Network Monitoring Arrives WAN Technologies (WANTEC) is currently constructing a new Network Operations Center (NOC) in the Primary building that will support WANTEC's industry leading WANCare services. WANCare Managed Network Services offer the latest technology for monitoring and outsourcing the management of your Wide Area Network via the World Wide Web. For Primary's colocation customers, special arrangements have been made to offer this service at a great rate.

The new NOC is being built adjacent to Primary's newly opened cage space where WANTEC will be installing its monitoring hardware and software. WANTEC Network technicians will be on premise 24 x7 x 365 supporting their new investments as well.
